

Aadarsh Kumar

Cloud Engineer | Cloud & Infrastructure

+91 6396682106 | aadarshkumar9916@gmail.com | Rishikesh, Uttarakhand | linkedin.com/in/aadarsh-795101212

SUMMARY

DevOps-focused Cloud Engineer with 3 years of experience in AWS, Linux, Docker, and CI/CD automation using Jenkins, GitHub Actions, and GitLab CI/CD. Working knowledge of Kubernetes and Ansible for container orchestration and configuration management. Skilled at designing scalable cloud infrastructure, automating deployments, and collaborating across teams to deliver reliable, high-availability systems.

PROFESSIONAL SKILLS

Cloud Platforms: AWS (EC2, S3, RDS, VPC), Azure, DigitalOcean, WHM — Provisioning, configuring, and securing compute, storage, database, and networking resources across multiple cloud providers.

CI/CD & Automation: Jenkins, GitHub Actions, GitLab CI/CD, AWS CodePipeline — Building automated build-test-deploy pipelines to ship code reliably and reduce manual release effort.

Containerization & Orchestration: Docker, Kubernetes (Basic), Ansible — Packaging applications into portable containers and using orchestration/config-management tools to deploy and manage them consistently.

Version Control: Git & Version Control — Managing source code history, branching, and collaborative workflows for team development.

Monitoring & Logging: CloudWatch, Prometheus, Grafana — Tracking system health, performance metrics, and logs to detect issues early and maintain uptime.

Scripting & Languages: Bash, Python — Writing scripts to automate routine operational tasks and system administration workflows.

Administration & Networking: Linux Administration, Network & System Administration, Google Workspace Admin — Configuring, securing, and troubleshooting servers, networks, and organizational IT systems.

Others: Apache, Nginx, DNS, Hosting, SSH — Setting up and maintaining web servers, domain configuration, hosting environments, and secure remote access.

PROFESSIONAL EXPERIENCE

Rubico

Cloud & Systems Engineer

Sep 2022 – Present

- Manage building-wide network infrastructure and troubleshoot Linux issues for internal teams.
- Install and maintain web servers (Apache, Nginx); deploy and manage applications on AWS (EC2, RDS, S3) and automate deployments with Elastic Beanstalk.
- Build and maintain CI/CD pipelines using GitHub Actions and AWS CodePipeline to streamline deployments.
- Write automation scripts in Bash, YAML, and Python to simplify routine tasks; work with Docker containers to ensure consistent application environments.
- Continuously monitor system performance with CloudWatch, enforce security best practices, and optimise cloud environments for high availability and scalability.

MISNT Service Private Limited

IT Support Engineer

Jan 2022 – Sep 2022

- Communicated with clients to understand technical issues and service needs; installed and maintained hardware and peripherals.
- Performed OS and software installations/upgrades; diagnosed and resolved network issues to minimise downtime.
- Prepared detailed service reports, managed inventory, and provided on-site and remote technical support.

EDUCATION

Bachelor of Computer Applications — Modern Institute of Technology (Aug 2019 – 2021)

CERTIFICATION

- CCNA, RHCSA, MCSA — MIS Dehradun
- AWS Cloud Practitioner Essentials — AWS Training & Certification (Completed July 2026)
